Project Title	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	Marks

Project Proposal (Proposed Solution) Report

The proposed solution is an AI-powered web platform that assists borrowers in managing loans, analyzing financial health, generating settlement recommendations, and creating AI-based negotiation letters. The platform combines React.js, FastAPI, SQLite, SQLAlchemy ORM, and Google Gemini AI to provide secure, intelligent, and user-friendly financial recovery support.

Project Overview	
Objective	Develop an AI-powered platform that simplifies debt management, monitors financial health, and provides intelligent settlement recommendations and negotiation support for borrowers.
Scope	The system covers user authentication, loan management, EMI tracking, AI-powered financial analysis, dashboard reporting, and secure storage of borrower information.
Problem Statement	
Description	Borrowers often struggle with multiple loans, increasing EMIs, delayed repayments, and limited financial guidance. These challenges make debt management difficult and increase financial stress.
Impact	The proposed solution improves financial awareness, supports better repayment planning, helps borrowers negotiate with lenders, and promotes informed financial decision-making.
Proposed Solution	
Approach	Build a responsive web application using React.js, FastAPI, SQLite, SQLAlchemy ORM, and Google Gemini AI to deliver personalized debt analysis, settlement recommendations, and negotiation letters.
Key Features	• Secure User Login and Registration • Loan & EMI Management • AI-Based Debt Analysis • Settlement Recommendations • Negotiation Letter Generation • Financial Health Dashboard

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware		
Computing Resources	Development Machine	Intel i5 / Ryzen 5 or above
Memory	RAM	8 GB or higher
Storage	Disk Space	50 GB Free SSD
Software		
Frameworks	Frontend & Backend	React.js, FastAPI
Libraries	Database & AI	SQLAlchemy ORM, Google Gemini API SDK
Development Environment	IDE & Tools	VS Code, Git, GitHub, Postman
Data		
Database	Loan & User Data	SQLite Database (Sample/Test Data)
API	External Service	Google Gemini API
