

Solution Requirements

Date	15 March 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements

Create a comprehensive list of requirements to define what the AI Powered Debt Relief & Financial Recovery Platform will do and how well it will perform.

Functional Requirements (FR): Define the key features of the platform, including user authentication, loan management, AI-powered debt analysis, settlement recommendations, negotiation letter generation, dashboard reporting, and secure data storage.

Non-Functional Requirements (NFR): Define the system's quality attributes, such as performance, security, reliability, scalability, usability, and availability.

Fill in the details for each category below

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	Secure user registration, login and password protection.	High
2	Authorization	Role-based access for Borrower and Admin.	High
3	External Interfaces	Google Gemini API, SQLite DB, FastAPI APIs.	High

S.No	Requirement Category	Requirement Description	Priority
4	Transaction Processing	Store loan details, EMI, repayments and AI analysis.	High
5	Reporting	Financial dashboard, debt score and AI reports.	Medium
6	Business Rules	Generate settlement recommendations based on user finances.	High
7	Compliance	Protect personal data and follow privacy guidelines.	High
8	Other	Notifications and profile management.	Low

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
------	--------------	-------------------------	-------------------------------------

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	Fast page loading and AI response.	Pages load <2 sec
2	Scalability	Support increasing users and loan records.	1000+ users
3	Security & Data Privacy	Encrypted passwords and secure APIs.	HTTPS & hashed passwords
4	Reliability & Availability	Stable service with backups.	99% availability
5	Usability & Accessibility	Responsive and easy-to-use interface.	Works on desktop/mobile
6	Other	Maintainable and portable architecture.	Easy cloud deployment
